Languages

- **English (Advanced)**
- **Spanish (Native)**
- **Catalan (Native)**

About me

Test Automation Engineer with over 11 years of experience, including 2 years as a squad manager, specialising in automating quality processes. I have mastered tools like Playwright and Cypress, and have experience in API testing using Karate and Postman. I've consistently worked in Agile/Scrum environments, focusing on streamlining testing workflows and enhancing team efficiency to deliver high-quality software.

Experience

04/2022 – 07/2024

Engineering Lead
wefox

- **Managing** & providing guidance to a 7 people **squad** including Frontend, Backend and QA profiles
- Provide training and career path for squad members
- **Performance review** of squad members
- As QA is my background, I provide support to the QA members of the team and lead new initiatives like the migration to **Playwright** testing framework.
- Ensure alignment with other squads/domains of the company
- Roadmap coordination with Product
- Participation in recruitment process for new members

08/2020 – 04/2022

Software Developer in Test
wefox

- Redefine **test strategy** of the squad
- Migration to **Cypress**
- Active participation in **CI/CD** flows definition using Github Actions
- Make quality a mindset for all the squad and involve members in the creation and maintenance of tests
- Implementation of Cypress dashboard and tests parallelization

01/2020 – 08/2020

QA Automation Engineer
wefox

- E2E **test automation** with Protractor & Node.js
- Monitoring of test pipelines from different teams/projects in the company
- Bug reporting a communication to involved teams
- Coordination & definition of automated regression tests for different teams in the company together with the manual QA's of each team

11/2017 – 01/2020

Quality Assurance Lead
Glownet

- Create & Coordinate a small QA team from scratch (2p)
- Continue doing other tasks being done before as the only QA Engineer

02/2016 – 11/2017

Head of Quality Assurance
Glownet

- Test Case definition, development and execution for Web and NFC-based Android apps
- Automated **API Testing**
- Test automation with Katalon (based in Selenium)
- Jenkins CI
- Implementation of scripts and test utilities with Python for **test data generation**
- Bug reporting
- On the field supervision of new features
- Making sure that communication between Support & QA teams is effective and transparent

03/2013 – 01/2016

Junior QA Engineer
GFT

- Test Suite design in **Gherkin** language and test scenarios specification for many web Apps related to Deutsche Bank and Barclays.
- Bug detection and report using **Jira** and HP ALM
- Development and execution of automated tests in Java with JBehave, Selenium and JUnit.
- Experience in **Agile** projects.
- Experience in performance testing using Load Runner and JMeter.

03/2013 – 01/2016

Internship in PDU Public Catalunya Projects
T-Systems

- Support in projects related with Catalan Health Institution
- Developing small software solutions programming in C# under MS .NET3.5 environment processing data in Oracle and SqlServer databases for Business Intelligence tools.
- Basic Knowledge of MS Sharepoint 2010.
- Testing applications with HP Quality Center Software.

Education

2006 – 2012

Degree in Technical Software Engineering
Polytechnic University of Catalonia

2011

European Project Semester
Copenhagen University College of Engineering

Final degree project made in group by students from different nationalities and fields done during my Erasmus exchange in Copenhagen.
